The hotel AI agent for dynamic promotions

Earn more from every room type on Booking.com. Track live competitor room prices and update promotions automatically, or in one click.

For hotels and aparthotels · Works with any PMS or RMS · No integration needed

01 Every room type

Price, units left and a suggested promotion for each room type, 30 nights ahead.

02 Live competitor rooms

Each room against competitor rooms that sleep as many guests. Read nightly, or live in one click.

03 Automatic or one click

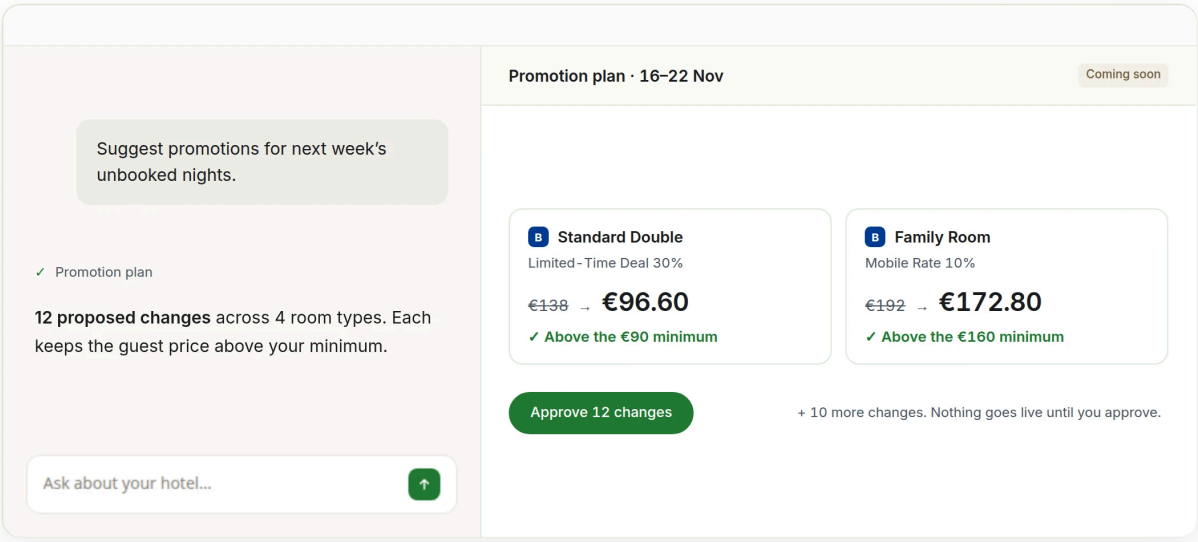

Promotions update every night, or you approve a plan in Claude or ChatGPT.

Trusted by 80+ hospitality operators in 40+ countries

BOB W. · QASWARAH · OOMPH APARTMENTS · RevTech · charlie

Automate your Extranet, or just ask Claude

Connect Claude or ChatGPT to your Extranet. Your assistant drafts promotions for each room type, and nothing goes live until you approve.

Ask or automate

> "Which room types are priced above my competitors next week?"

> "Check competitor room prices for Saturday now."

> "Keep promotions for every room type up to date every night."

> "Every morning, draft last-minute deals for unsold nights, never below my minimum."

Nozol Noor, part of Qaswarah · 10 properties in 8 buildings, Medina. The agent sets their Booking.com promotions every day.

+24%
Booking.com revenue in the first 56 days

+$54.6K
Incremental revenue versus the previous period (SAR 204,868)

$52
Average daily rate (SAR 196), held while discounts were restructured

01 Connect Booking.com

Grant access in a few clicks. No PMS integration needed.

02 Connect your assistant

Add myDataValue in Claude or ChatGPT and sign in.

03 Set your targets

We review targets and competitors with you, then start a 7-day free trial.
